We Are Raei

One place for everyone who cares
about pets: adoption, care, and the
nearest clinics.

#AdoptDontBuy

THE PROBLEM

The effort is scattered, and the animal that needs a home gets lost in it

1

Animals with no shelter

Injured or stray cases are posted across temporary group chats that disappear within hours.

2

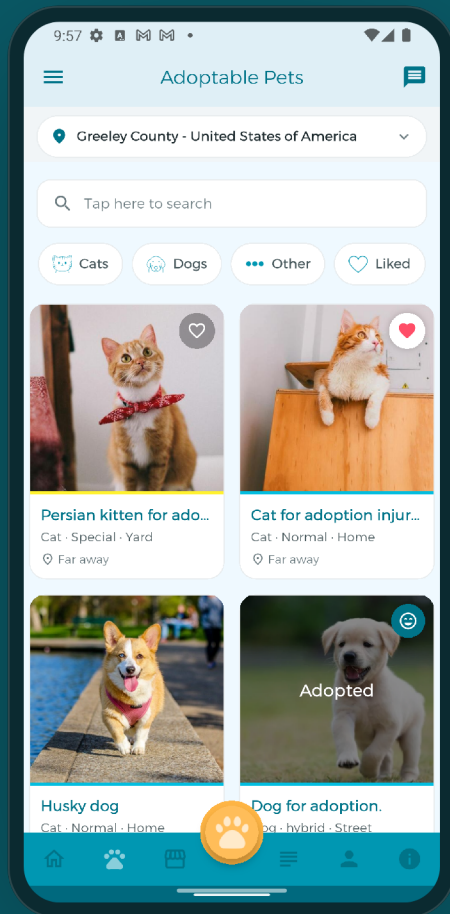

Adoption without clarity

Adopters cannot see the species, the health status, or the location before they reach out.

3

Invisible services

Clinics, stores, and boarding have no direct channel to the pet owners right next to them.

THE SOLUTION

One app that matches a case to a home and to the nearest service

- 1 Post a case with a photo, a location, and a clear health status
- 2 A directory of clinics, stores, and boarding ranked by distance and rating
- 3 In-app chat and a care pledge before any adoption is completed

PART TWO

A tour of the app

HOME SCREEN

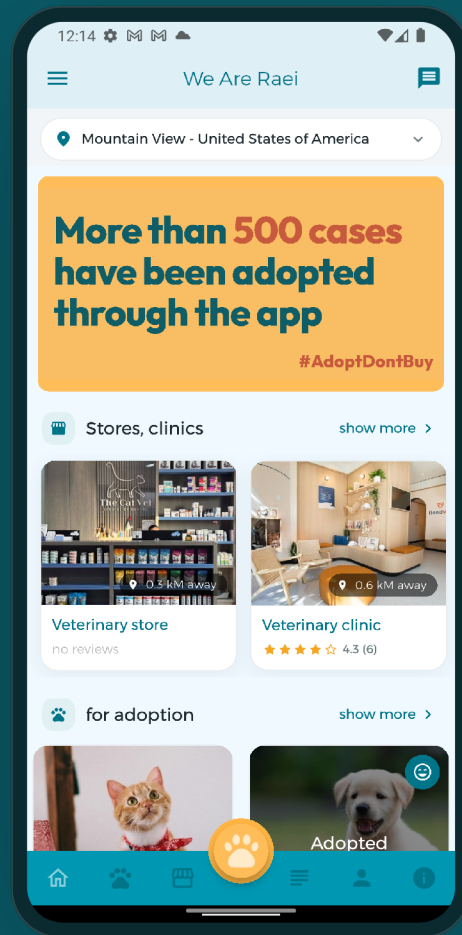

Everything starts from where the user is

The city selector at the top sets the scope for everything below it.

A standing awareness banner carries the mission: adopt before you buy.

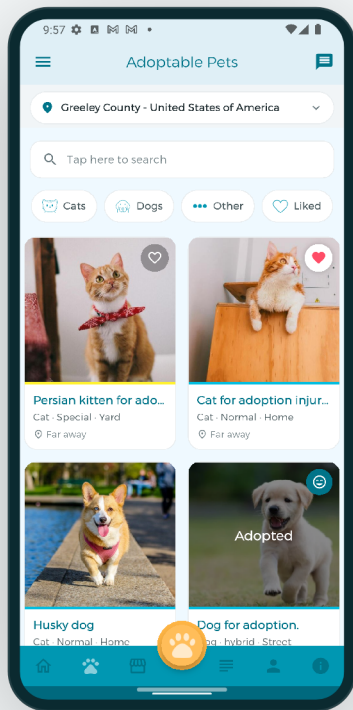

Two short sections: nearby stores and clinics, then pets for adoption.

A fixed bottom bar with the centre paw button for quick posting.

BROWSE AND FILTERS

Two steps from search to the right case

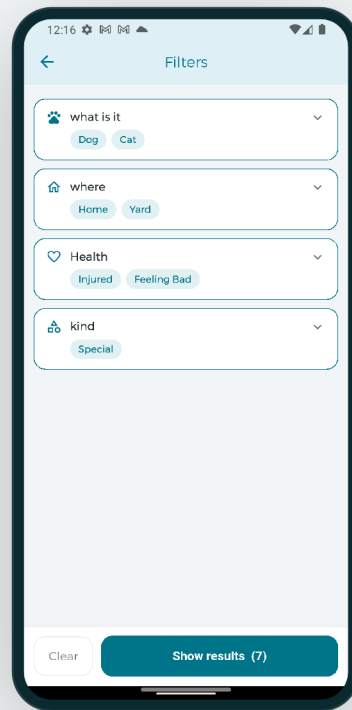

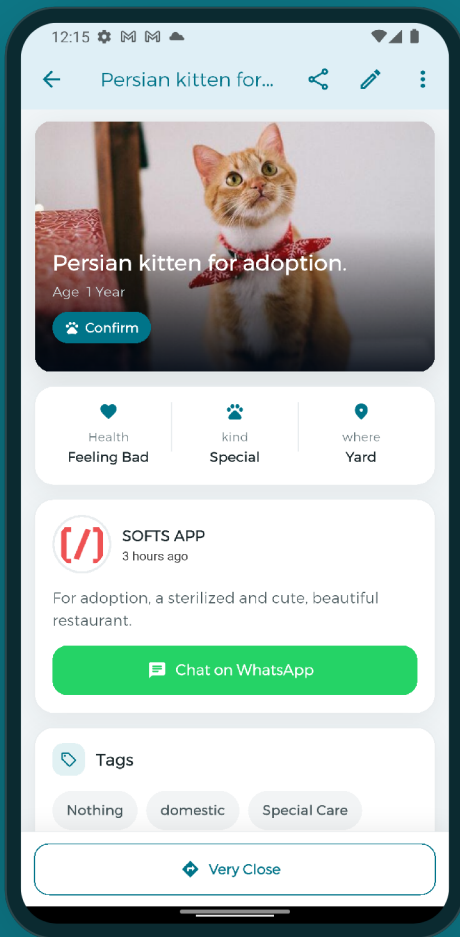

Quick categories

Cats, dogs, other, and liked — one tap from the top of the list.

Four filters

Species, place, health, and kind — with the result count before you apply.

CASE PROFILE

Enough detail to decide before any contact

Health

**Normal or
needs care**

Where

**Home, yard, or
street**

Kind and age

**Domestic or
special**

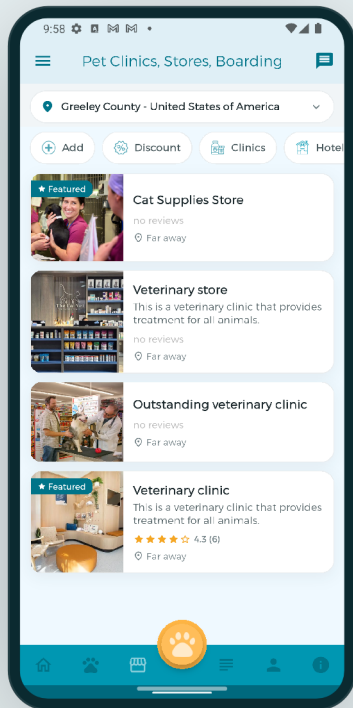

Trust badge

Confirmed case

At the bottom: distance from the user and a direct line to whoever posted the case.

CLINICS AND STORES

A nearby service directory with real ratings and direct contact

Three categories

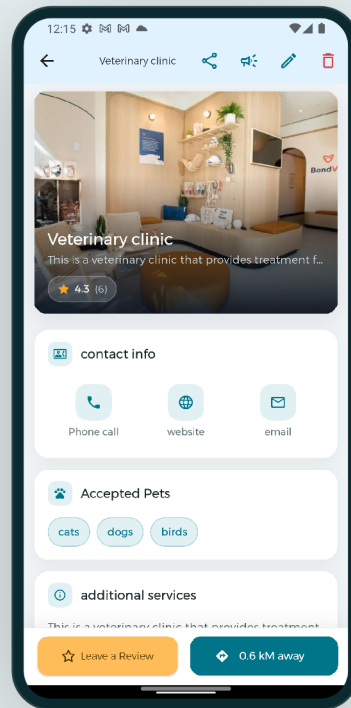

Clinics, stores, and boarding — plus a filter for discounts.

A full business profile

Phone, website, email, accepted pets, and additional services.

For partners

Add your business, feature it, and announce offers to people in range.

No request is sent before the care pledge is signed

Name and mobile are pulled from the profile, and the pledge travels with the request as a record for both sides.

Use my same information

Your name

Mobile

Save this info to my profile

your message

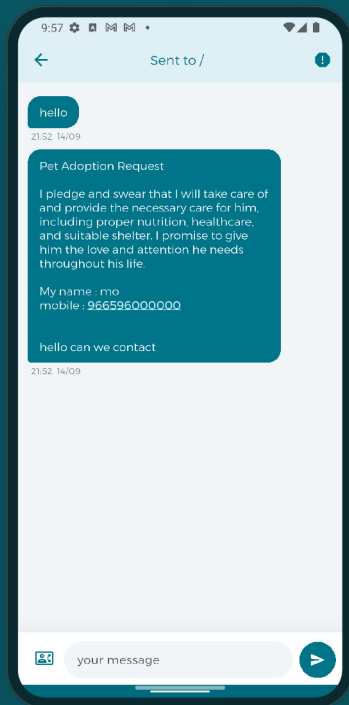

I pledge and swear that I will take care of and provide the necessary care for him, including proper nutrition, healthcare, and suitable shelter. I promise to give him the love and attention he needs throughout his life.

I pledge and swear to this

Save

CHAT AND LOCATION

In-app chat keeps the request on record and protects both sides

A structured request

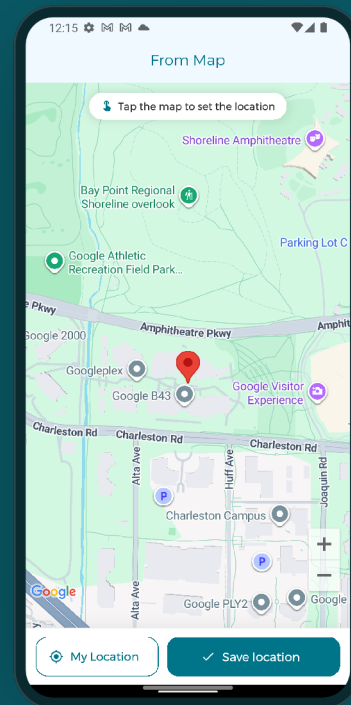

Sent as one message holding the pledge, the name, the mobile, and the adopter's note.

Report and protect

A report button sits at the top of every conversation for misuse or bad listings.

Pin it on the map

Tap the map or use My Location to set where the case or the business is.

**Every one of us is a caretaker,
and this app is where we meet**
